

IsatTruck™

GMPCS's Satellite-Phone
Vehicle Package Via Inmarsat

Communication Delivered Loud And Clear, Wherever And Whenever

Whenever your vehicle or truck is outside of cellular range, the IsatTruck™ system keeps field personnel in touch with headquarters, office or studio. Providing basic voice service via Inmarsat's satellite network and new "IsatPhone" service, GMPCS bundles the satphone, docker, mobile antenna and airtime service – for true one-stop-shopping. The IsatTruck system allows for satellite phone calls whether outside your vehicle, stopped on site or even on-the-move.

IsatTruck™ The ultimate combination:

IsatPhone Pro works globally on the Inmarsat Network. As tough as they come the Pelican case protects the phone and accessories when not in use. The BEAM Isat Pro Docker is an all in one design featuring single action insertion mechanism, key lockable & securable to vehicle, wall or desk, accessible control buttons, slimline privacy handset, integrated antenna connections, inbuilt speaker / microphone and cable routing LHS/TOP/BOTTOM. Its INTELLIGENT POTS/RJ11 INTER-FACE, has up to 600m of RJ11 and dial, ring & busy tones, includes integrated to PABX System. The IsatTruck uses the Magnetic Mount Antenna and is very easy to install and move from asset to asset and doesn't require any holes to be drilled for fitting.
